Sustainable Palm Oil Policy

The vast majority of Lion's product portfolio is free of Palm Oil and its derivatives. Our use of small amounts of Palm Oil or its derivatives present in some ingredients is limited to less than 1.5% of our dairy and non-alcohol drinks products. We do not use palm oil in our alcohol beverages made by or on behalf of Lion*.

Lion recognises the concern some consumers have around the ecological and environmental impacts of Palm Oil production. We share these concerns and acknowledge our responsibility to ensure Palm Oil used is from sustainable sources.

This policy is based on the Consumer Goods Forum Sustainable Palm Oil Sourcing Guidelines (2015) which recommends certification through the Roundtable on Sustainable Palm Oil (RSPO).

We are committed to working with our suppliers to ensure that by 2018 we use 100% RSPO certified sustainable Palm Oil by the Mass Balance Supply Chain model (at a minimum), incorporating protection of high conservation areas and social and human rights.

This policy will be reviewed annually and updated to reflect changing practices of the palm industry and RSPO certification.

**This policy applies to products made by or on behalf of Lion. Where possible, Lion will work with our partners to extend this policy to imported beer and RTDs that are produced in other markets and distributed by Lion in Australia and New Zealand.*
